Installation

1. Layout your installation prior to installing clips. StarStrand Channel Star is a 24V 4-Pin system. You must use the StarStrand 4-Pin to 6-Pin Adapter Cord, which is included with each 24", 36" and 48" StarStrand Channel Star 24 items, to connect to the 24V 6-Pin driver. StarStrand 4-Pin Connecting Cords are available in 3", 13", 73" lengths if driver needs to remote from StarStrand Channel Star 24. Do not exceed distance of 24' from driver to StarStrand Channel Star 24 installation. If connecting cords are in a difficult to reach area it is recommended to use heat shrink tubes over cord connections to make sure cords do not disconnect.
2. Do not exceed maximum runs listed on chart on reverse side of these instructions. Connecting cords may be used between sections of StarStrand Channel Star 24 when necessary. The length of the connecting cord does not affect maximum run. Maximum run distances listed are the length of StarStrand Channel Star 24 only. Do not exceed distance of 12' between 2 sections of StarStrand Channel Star 24.
3. Connector pins are made of brass and care needs to be taken not to bend pins during installation.
