

# Installation Instructions

## Model E22335-BK

1. It is recommended the fixture be installed by a qualified licensed electrician.
2. Turn breaker off for circuit on outlet where fixture is to be installed.
3. Install rectangular mounting bracket to outlet box.
4. Determine mounting height of fixture and adjust wires accordingly.
5. Wire fixture to outlet. Connect white to neutral and green to ground.
6. Install fixture onto rectangular mounting bracket and tighten screws to secure.

The fixture is designed to work with a standard Triac forward phase dimmer. Dimming levels will vary by dimmer.

Below is a list of recommended dimmers:

Lutron MACL-153M

Lutron DVL-153P

Lutron SCL-153P

Leviton IPL06-10Z

Leviton 6674-POW

Due to inrush current wattage should not exceed 150 watts of product for a 600 watt dimmer.

**WARNING:** Wires need to be connected to driver found in canopy and should not connect directly to power source or a short might occur.
